Screaming Frog is famous in the SEO industry for our SEO Spider Tool.

Issue Details | View: Details

Internal URIs with a client-side error. This indicates a problem occurred with the URL request and can include responses such as 400 bad request, 403 Forbidden, 404 Page Not Found, 410 Removed, 429 Too Many Requests and more. A 404 Page Not Found is the most common, and often referred to as a broken link. View URLs that link to errors using the lower 'inlinks' tab and export them in bulk via 'Bulk Export > Response Codes > Internal > Client Error (4xx) inlinks'.

How To Fix

All links on a website should ideally resolve to 200 'OK' URLs. Errors such as a 404 or 410 should be updated to their correct locations, removed and redirected where appropriate. A 403 forbidden error occurs when a web server denies access to the SEO Spider's request and can often be resolved by switching the user-agent to Chrome via 'Config > User-Agent' and crawling again.

Table with columns: Row, Address, Content Type, Status Code, Status, Indexability, Indexability Status, Title 1. Contains 46 rows of crawl data for the website.

Issues panel showing a list of 49 issues with columns: Issue Name, Issue Type, Issue Priority, URLs, % of Total. Includes issues like 'Response Codes: Internal Client Error (4xx)', 'Canonicals: Non-Indexable Canonical', etc.

Export Selected Cells: 1 Filter Total: 2,268

Export table with columns: Name, Value. Shows details for the selected URL: https://www.government.nl/. Fields include Name, Address, URL Encoded Address, Content Type, Status Code, Status, Indexability, and Title 1.

Description

Internal URLs with a client-side error. This indicates a problem occurred with the URL request and can include responses such as 400 bad request, 403 Forbidden, 404 Page Not Found, 410 Removed, 429 Too Many Requests and more. A 404 "Page Not Found" is the most common, and often referred to as a broken link. View URLs that link to errors using the lower "inlinks" tab and export them in bulk via Bulk Export > Response Codes > Internal > Client Error (4xx) inlinks.

How To Fix

All links on a website should ideally resolve to 200 'OK' URLs. Errors such as a 404 or 410 should be updated to their correct locations, removed and redirected where appropriate. A 403 forbidden error occurs when a web server denies access to the SEO Spider's request and can often be resolved by switching the user-agent to Chrome via 'Config > User-Agent' and crawling again.

Issue Details View: Details

Description
 Internal URLs with a client-side error. This indicates a problem occurred with the URL request and can include responses such as 400 bad request, 403 Forbidden, 404 Page Not Found, 410 Removed, 429 Too Many Requests and more. A 404 'Page Not Found' is the most common, and often referred to as a broken link. View URLs that link to errors using the lower 'Inlinks' tab and export them in bulk via 'Bulk Export > Response Codes > Internal > Client Error (4xx) Inlinks'.

How To Fix
 All links on a website should ideally resolve to 200 'OK' URLs. Errors such as a 404 or 410 should be updated to their correct locations, removed and redirected where appropriate. A 403 forbidden error occurs when a web server denies access to the SEO Spider's request and can often be resolved by switching the user-agent to Chrome via 'Config > User-Agent' and crawling again.

Issue Details

Description

Internal URLs with a client-side error. This indicates a problem occurred with the URL request and can include responses such as 400 bad request, 403 Forbidden, 404 Page Not Found, 410 Removed, 429 Too Many Requests and more. A 404 'Page Not Found' is the most common, and often referred to as a broken link. View URLs that link to errors using the lower 'Inlinks' tab and export them in bulk via Bulk Export > Response Codes > Internal > Client Error (4xx) inlinks.

How To Fix

All links on a website should ideally resolve to 200 'OK' URLs. Errors such as a 404 or 410 should be updated to their correct locations, removed and redirected where appropriate. A 403 forbidden error occurs when a web server denies access to the SEO Spider's request and can often be resolved by switching the user-agent to Chrome via 'Config > User-Agent' and crawling again.

Issue Details View: Details

Description
Pages which have duplicate <h1>s. It's important to have distinct, unique and useful main headings. If every page has the same <h1>, then it can make it more challenging for users and the search engines to understand one page from another.

How To Fix
Update duplicate <h1>s as necessary, so important pages contain a unique and descriptive <h1> for users and search engines. If these are duplicate pages, then fix the duplicated pages by linking to a single version, and redirect or use canonicals where appropriate.

Issue Details View: Details

Description
Internal URLs with a client-side error. This indicates a problem occurred with the URL request and can include responses such as 400 bad request, 403 Forbidden, 404 Page Not Found, 410 Removed, 429 Too Many Requests and more. A 404 'Page Not Found' is the most common, and often referred to as a broken link. View URLs that link to errors using the lower 'inlinks' tab and export them in bulk via 'Bulk Export > Response Codes - Internal > Client Error (4xx) inlinks'.

How To Fix
All links on a website should ideally resolve to 200 'OK' URLs. Errors such as a 404 or 410 should be updated to their correct locations, removed and redirected where appropriate. A 403 forbidden error occurs when a web server denies access to the SEO Spider's request and can often be resolved by switching the user-agent to Chrome via 'Config > User-Agent' and crawling again.

Issue Details

Description

Internal URLs with a client-side error. This indicates a problem occurred with the URL request and can include responses such as 400 bad request, 403 Forbidden, 404 Page Not Found, 410 Removed, 429 Too Many Requests and more. A 404 'Page Not Found' is the most common, and often referred to as a broken link. View URLs that link to errors using the lower 'inlinks' tab and export them in bulk via 'Bulk Export > Response Codes > Internal > Client Error (4xx) inlinks'.

How To Fix

All links on a website should ideally resolve to 200 'OK' URLs. Errors such as a 404 or 410 should be updated to their correct locations, removed and redirected where appropriate. A 403 forbidden error occurs when a web server denies access to the SEO Spider's request and can often be resolved by switching the user-agent to Chrome via 'Config > User-Agent' and crawling again.

Introductie pdf-technieken van de PDF Association

door Iacobien Riezebosch van Documenten en toegankelijkheid

De Accessibility Werkgroep van de PDF Association ontwikkelde nieuwe pdf-technieken als alternatief voor de verouderde pdf-technieken van het W3C. Een pdf-techniek is een beschrijving van hoe een specifiek aspect van een toegankelijke pdf of juist een ontoegankelijke pdf in elkaar zit met daarbij tests en voorbeelden. Iacobien geeft een introductie.

Naar een professionele aanpak van het pdf-vraagstuk

door Saskia Schrijver van Inhoud telt

Pdf is al jaren het probleemkind binnen digitale toegankelijkheid. Geleidelijk aan beseffen organisaties dat een meer centrale aanpak nodig is en dat professionaliteit in de organisatie essentieel is. Meer centraliseren en meer kennis in huis. Saskia vertelt wat er in de organisatie nodig is om echt te professionaliseren.

Memory Allocation

Read more in our [user guide](#)

Configure how much RAM the SEO Spider can use. Typically, using database storage mode and allocating 4GB of RAM will allow crawling of up to 2m URLs.

Info
A restart will be required for any changes to this configuration to take effect.

12 GB of 16GB available (14GB maximum allowed)

OK and Restart OK Cancel

Increase the RAM

 Licence User Interface Language Proxy Storage Mode Memory Allocation Embedded Browser Trusted Certificates Storage ModeRead more in our [user guide](#)

Choose to store crawled data in RAM, or in a database on your disk drive. Switching to database storage will allow the SEO Spider to crawl more URLs. Crawls will be auto-saved and available via the 'File > Crawls' menu.

 Info

A restart will be required for any changes to this configuration to take effect.

 Database Storage

Increases the number of URLs that can be crawled for a given memory setting by storing all data to disk. We recommend using an SSD for this mode. We strongly recommend against using a network drive, or a location that's synced to cloud storage.

Directory   Browse...  Reset

Crawls are stored in a folder named 'ProjectInstanceData' within this folder. If you change the database location and wish to bring existing crawls to the new location, move 'ProjectInstanceData' to the new location.

 Memory Storage

All crawl data is stored in memory (RAM).

Use Database Storage Mode

OK and Restart

OK

Cancel

No-index

Used to prevent search engines from showing your pages:

Block Search indexing with `noindex` 

[Send feedback](#)

`noindex` is a rule set with either a `<meta>` tag or HTTP response header and is used to prevent indexing content by search engines that support the `noindex` rule, such as Google. When Googlebot crawls that page and extracts the tag or header, Google will drop that page entirely from Google Search results, regardless of whether other sites link to it.

<https://developers.google.com/search/docs/crawling-indexing/block-indexing>

No-index in Screaming Frog

The screenshot displays the Screaming Frog SEO Spider interface. The main table lists various URLs from the domain 'https://www.government.nl'. A vertical red box highlights the 'Indexability' column, where many entries are marked as 'Non-indexable'. The right sidebar shows a list of issues, including 'Pagination: non-200' and 'Response Codes: External Client Error (4xx)'. The bottom section shows a 'Selected Cells' table with columns for Name, Address, URL Encoded Address, Content Type, Status Code, Indexability, and Indexability Status.

Name	Value
Address	https://www.government.nl/topics/european-union/documents?sort-by=relevance
URL Encoded Address	https://www.government.nl/topics/european-union/documents?sort20by=relevance
Content Type	text/html; charset=UTF-8
Status Code	200
Indexability	Non-indexable
Indexability Status	Canonicalised

If Google can't crawl/index
your content, screen readers
might struggle too.

Issue Details View: Details

Description

Images that have an alt attribute, but are missing alt text. Click the address of the image and then the 'Image Details' tab in the lower window pane to view which pages have the image on them, and are missing alt text. Images should have descriptive alternative text about its purpose, which helps the blind and visually impaired, and the search engines understand it and its relevance to the web page.

How To Fix

Include descriptive alt text for images to help users and the search engines understand them better. Where possible, decorative images should be provided using CSS background images or alternatively a null (empty) alt text should be provided (alt="") so that they can be ignored by assistive technologies, such as screen readers.

Image: All Text Over 100 Characters

Image: Missing Alt Text

Image: Missing Size Attributes

The Netherlands most important tulip?

Description

Images that have an alt attribute, but are missing alt text. Click the address of the image and then the 'Image Details' tab in the lower window pane to view which pages have the image on them, and are missing alt text. Images should have descriptive alternative text about its purpose, which helps the blind and visually impaired, and the search engines understand it and its relevance to the web page.

How To Fix

Include descriptive alt text for images to help users and the search engines understand them better. Where possible, decorative images should be provided using CSS background images or alternatively a null (empty) alt text should be provided (alt="") so that they can be ignored by assistive technologies, such as screen readers.

Alt Text in Screaming Frog

Issue Details View Details

Description

Images which have one instance of alt text over a threshold of characters in length. This is not strictly an issue, however image alt text should be concise and descriptive. It should not be used to stuff lots of keywords or paragraphs of text onto a page.

How To Fix

Write concise alt text that's helpful for users and search engines - without keyword stuffing.

Alt Text in Screaming Frog

The screenshot displays the Screaming Frog SEO Spider interface. The main table lists various issues found on the website, with a focus on alt text. A large text overlay reads: "Alt Text over 100 characters (WCAG recommends 125)".

The detailed view shows the following information:

- Issue Name:** Description
- Description:** Images which have one instance of all text over a threshold of characters in length. This is not strictly an issue, however image alt text should be concise and descriptive. It should not be used to stuff lots of keywords or paragraphs of text onto a page.
- How To Fix:** Write concise alt text that's helpful for users and search engines - without keyword stuffing.

Alt Text in Screaming Frog

Prime Minister Mark Rutte delivers a speech about the role of the Netherlands

Alt Attributes

If some images don't need a description, it's still helpful to provide the attribute.

Issue Details View Details

Description

Large images over a size threshold. Page speed is extremely important for users and SEO and often large resources such as images are one of the most common issues that slow down web pages. This filter simply acts as a general rule of thumb to help identify images that are fairly large in file size and may take longer to load. These should be considered for optimisation, alongside opportunities identified in the PageSpeed tab which uses the PSI API and Lighthouse to audit speed. This can help identify images that haven't been optimised in size, load/offscreen, are unoptimised etc.

How To Fix

Uncompressed images bloat pages with unnecessary bytes, so ensure images are optimised with compression, properly scaled, and using the best image format to reduce file size where possible.

Big Images

Find and export the big files that might be slowing your site.

The screenshot displays the Screaming Frog SEO Spider interface. The main window shows a list of URLs with columns for Row, Address, and various metrics. A large text overlay reads "Find and export the big files that might be slowing your site." Below the list, a detailed view of a selected image is shown, including a thumbnail of a tulip and the text "The Netherlands' most important tulip?". The right-hand panel displays a summary of issues, warnings, and opportunities, with a table showing the distribution of issues by priority and type.

Issue Priority	URLs	% of Total
Low	63	1.64%
Medium	9	0.23%
Medium	36	0.94%
Low	14	0.36%
Low	387	10.00%
Low	1,412	36.78%
Low	2,413	62.85%
Low	83	2.16%
Low	216	5.63%
Low	8	0.21%
Low	444	11.39%
Low	620	15.89%
Medium	206	5.34%
Low	13	0.34%
Low	3	0.08%
Low	76	1.95%
Low	52	1.35%
Low	75	1.95%
Low	30	0.78%
Low	927	24.15%

Carola Schouten

H1

'I want to work towards a society in which people can achieve their full potential. A society in which we reduce the risk of poverty and increase job opportunities, for everyone. Because all of us have something to contribute and are therefore valuable. And equally valuable is a well-earned old age pension. I'm going to work to achieve that.'

Custom Extraction- Get all H2s

The screenshot shows the 'Crawl Config' application window. On the left is a sidebar menu with various configuration categories. The 'Custom' category is expanded, and 'Custom Extraction' is selected. The main panel is titled 'Custom > Custom Extraction' and contains a table for defining extraction rules. The first rule, 'Extractor 1', is configured with the 'XPath' method. A dropdown menu is open over the 'XPath' method selection, showing 'XPath' as the selected option. The table also includes a 'Delete All' button at the bottom left and an 'Add' button at the bottom right. The application window has standard OS window controls (minimize, maximize, close) in the top right corner.

Custom Extraction- Get all H2s

The screenshot displays the 'Visual Custom Extraction' tool interface. The main window shows a web page from 'https://www.government.nl/' with various sections like 'Justice, security and defence', 'Migration and travel', and 'Taxes, benefits and allowances'. A 'Spotlight' section is highlighted at the bottom. On the right, the 'Extraction' configuration panel is open, showing the following settings:

- Name: Extractor 1
- Expression: //h2
- Type: XPath
- Data: Extract Inner HTML
- Attribute (Optional):

The 'Suggestions' list includes the following XPath expressions:

- //h2
- //h2[1]
- //div[@class=fullWidthSection]/section/h2
- //div[@class=fullWidthSection]/section/h2[1]
- //*[@id="content-wrapper"]/div[3]/div[2]/section[1]/h2
- /html/body/div/main/div[3]/div[2]/section[1]/h2

The 'Rendered HTML Preview' and 'Source HTML Preview' sections show a list of items: Main menu, Spotlight, News, Service, and About this site.

Custom Extraction- Get all H2s

The screenshot displays the Visual Custom Extraction tool interface. The main window shows a web page from <https://www.government.nl/>. The page content includes sections for "Justice, security and defence", "Nature and the environment", and "Transport". A "Spotlight" section is highlighted with a green bar and a green arrow pointing to it from the central text box. The right-hand panel shows the extraction configuration for "Extractor 1". The "Expression" is set to `//h2`, the "Type" is "XPath", and the "Data" is "Extract Inner HTML". A "Suggestions" list is visible, with `//h2` selected. The "Rendered HTML Preview" and "Source HTML Preview" sections show the extracted content.

Click on what you want to extract.

Checking Internal Links

Checking Internal Links

3. There is no step 3

Checking Internal Links

This was a lie. :O

3. There is no step 3

Step 3:

Enable Crawl Analysis

The screenshot displays the Screaming Frog Spider 20.1 interface. The 'Crawl Analysis' menu item is highlighted with a red box. The 'Crawl Config' dialog box is open, showing various analysis options. The 'Crawl Analysis' section is selected in the left-hand menu.

Crawl Config

Search...

Crawl Analysis

Some data and filters can only be calculated by analysing the crawl when it is paused or completed. To run crawl analysis, click 'Crawl Analysis > Start' from the top level menu, or enable 'Auto-analyse at End of Crawl' below. Resuming a paused crawl will clear data.

Auto-analyse at End of Crawl

OK Cancel

Step 3:

More data
based off a
100%
complete
crawl.

The screenshot shows the 'Crawl Analysis' settings dialog box in the Screaming Frog software. The dialog box is titled 'Crawl Analysis' and contains a list of analysis options, each with a checked checkbox. The options are: Link Score, Response Codes, Content, Images, Canonicals, Pagination, Hreflang, Links, Analytics, and Search Console. Below the list, there is an unchecked checkbox for 'Auto-analyse at End of Crawl'. The dialog box is highlighted with a red border. In the background, a portion of the main software interface is visible, showing a list of links and a search bar.

Readability Scores

Based off Flesch Reading Ease

The formula for the Flesch reading-ease score (FRES) test is –

$$206.835 - 1.015 \left(\frac{\text{Total Words}}{\text{Total Sentences}} \right) - 84.6 \left(\frac{\text{Total Syllables}}{\text{Total Words}} \right)$$

Score	School level (US)	Avg. words per sentence	Syllables per 100 words	Notes
100 - 90	5th grade	8	123	Very easy to read. Easily understood by an average 11-year-old student.
90-80	6th grade	11	131	Easy to read. Conversational English for consumers.
80-70	7th grade	14	139	Fairly easy to read.
70-60	8th & 9th grade	17	147	Plain English. Easily understood by 13- to 15-year-old students.
60-50	10th to 12th grade	21	155	Fairly difficult to read.
50-30	College	25	167	Difficult to read.
30-10	College graduate	29	192	Very difficult to read. Best understood by university graduates.
10-0	Professional			Extremely difficult to read. Best understood by university graduates.

Readability Scores

Aim to make these fairly easy-very easy.

Speling & Grammar

Speling &, Grammar

The screenshot displays the 'Spelling & Grammar' configuration window in a web crawler application. The window is titled 'Crawl Config' and contains a search bar and a list of settings. The 'Spelling & Grammar' option is selected and highlighted in orange. A dropdown menu is open, showing a list of languages. The 'Dutch' option is highlighted in orange. The background shows a table with columns for 'Count', 'Sentence Count', and 'Average Words Per Sentence'. The table contains the following data:

Count	Sentence Count	Average Words Per Sentence	
53		14	
52		14	
58		15	
144		26	
91		20	
35		9

The language list in the dropdown menu includes: Arabic, Asturian, Belarusian, Breton, Catalan, Chinese, Danish, Dutch (highlighted), English (Australia), English (Canada), English (New Zealand), English (South Africa), English (United Kingdom) (checked), English (United States of America), French, Galician, German (Austria), German (Germany), German (Switzerland), Greek, Italian, Japanese, Khmer, Persian (Afghanistan), Persian (Iran (Islamic Republic of)), Polish, Portuguese (Angola), Portuguese (Brazil), Portuguese (Mozambique), Portuguese (Portugal), Romanian, Russian, Slovak, Slovenian, Spanish, Swedish, Tagalog, Tamil, and Ukrainian.

Speling &, Grammar

(Yes you can make it check Dutch.)

The screenshot displays the configuration interface of a web crawler. On the left, a sidebar menu lists various settings categories, with 'Spelling & Grammar' highlighted. A dropdown menu is open, showing a list of languages. 'Dutch' is selected and highlighted in orange. Other visible languages include Arabic, Asturian, Belarusian, Breton, Catalan, Chinese, Danish, English (Australia), English (Canada), English (New Zealand), English (South Africa), English (United Kingdom), English (United States of America), French, Galician, German (Austria), German (Germany), German (Switzerland), Greek, Italian, Japanese, Khmer, Persian (Afghanistan), Persian (Iran (Islamic Republic of)), Polish, Portuguese (Angola), Portuguese (Brazil), Portuguese (Mozambique), Portuguese (Portugal), Romanian, Russian, Slovak, Slovenian, Spanish, Swedish, Tagalog, Tamil, and Ukrainian. In the background, a table with columns for 'Closest Similarity Match', 'No. Near Duplicates', 'Total Language Errors', and 'Spelling Errors' is visible. The interface also includes a search bar and a 'Subdomain' dropdown.

English (New Zealand)

English (South Africa)

✓ English (United Kingdom)

English (United States of America)

The screenshot shows a web crawler interface with a list of issues on the right and a language selection menu on the left. The issues list includes:

- Issue Name: Security: HTTP URLs
- Response Codes: Internal Server Error (5)
- Response Codes: Internal Redirection (3x)
- Response Codes: Internal Redirection Chain
- Response Codes: Internal No Response
- Response Codes: Internal Client Error (4x)

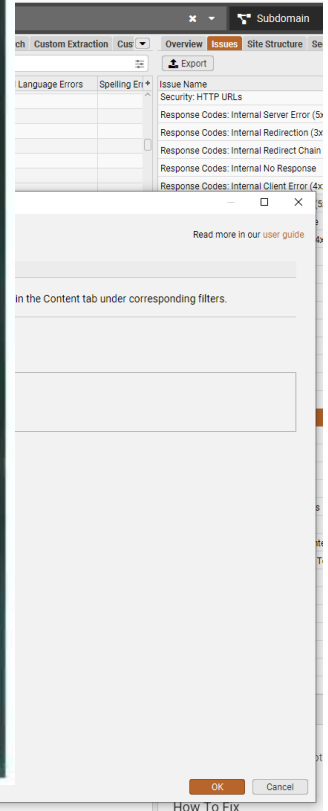

The language selection menu on the left includes:

- Authentication
- Segments
- Crawl Analysis
- Tagalog
- Tamil
- Ukrainian

At the bottom of the interface, there are buttons for "OK" and "Cancel", and a status bar indicating "No URL selected".

Spelin

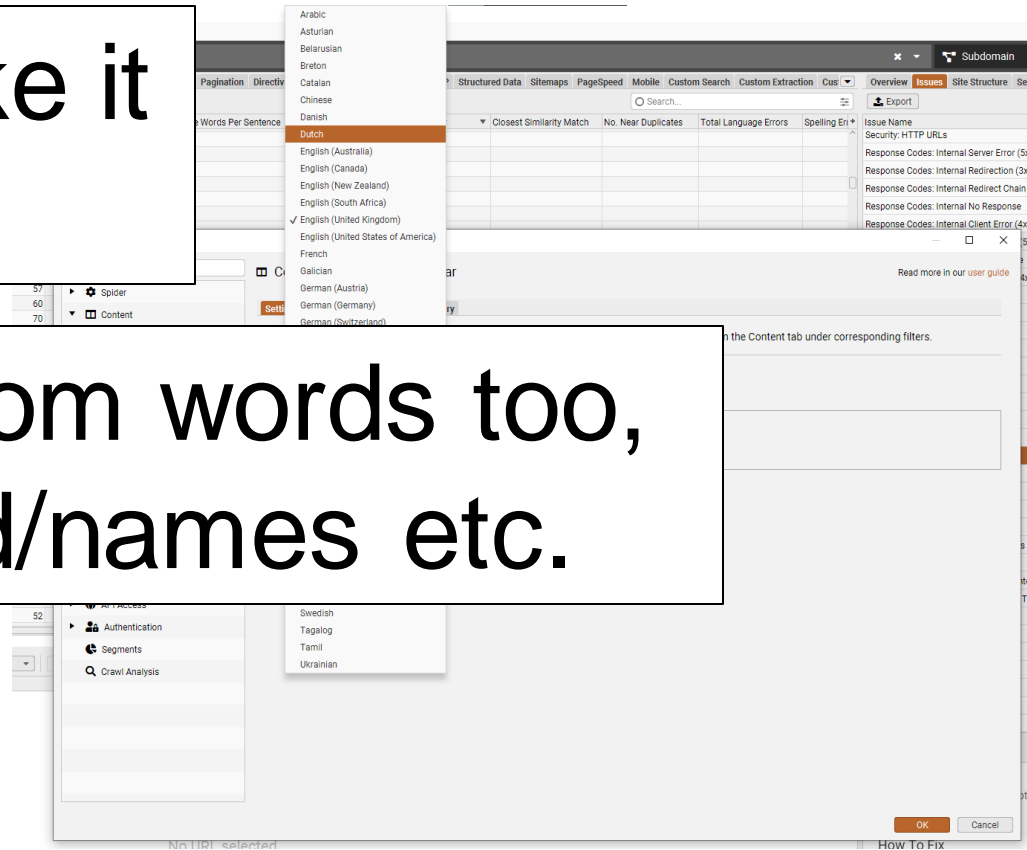

(Yes y check

Speling &, Grammar

(Yes you can make it check Dutch.)

You can add custom words too, for common brand/names etc.

PDFs

Introductie pdf-technieken van de PDF Association

door Iacobien Riezebosch van Documenten en toegankelijkheid

De Accessibility Werkgroep van de PDF Association ontwikkelde nieuwe pdf-technieken als alternatief voor de verouderde pdf-technieken van het W3C. Een pdf-techniek is een beschrijving van hoe een specifiek aspect van een toegankelijke pdf of juist een ontoegankelijke pdf in elkaar zit met daarbij tests

Please don't
tell the PDF
Police.

Naar een professionele aanpak van het

door Saskia Schrijver van Inhoud telt

Pdf is al jaren het probleemkind binnen digitale toegankelijkheid. Geleidelijk aan beseffen organisaties dat een meer centrale aanpak nodig is en dat professionaliteit in de organisatie essentieel is. Meer centraliseren en meer kennis in huis. Saskia vertelt wat er in de organisatie nodig is om echt te professionaliseren.

How to Crawl with ChatGPT

Introduction To Crawling with ChatGPT

Using the Custom JavaScript feature in the SEO Spider, it's possible to communicate with APIs such as OpenAI's ChatGPT during a crawl.

Having AI on hand while crawling opens up a world of possibilities. It enables you to use prompts against elements of a page while crawling.

You could use OpenAI's various models for all kinds of purposes, such as:
